Diversity, Equity and Inclusion

"Diversity is having a seat at the table, inclusion is having a voice, and belonging is having that voice be heard."

**LIZ FOSSLIE AND
MOLLIE WEST DUFFY**

Why SICR

A trusted voice within the community.

A commitment to providing the highest quality of learning to all.

A catalog of impact-driven research educational programs.

A platform to connect with the community in the Research field.

CONSULT. TRAIN. EMPOWER.

Our Vision

'Sikhs in Clinical Research' (SICR) continues to amplify and raise awareness on the clinical research workforce to help increase the impact as much as possible.

SICR is committed to fostering the development and retention of the Sikh community in the clinical research workforce. SICR engages the Sikh community in research and values professional mentorship. This is an incredible opportunity to learn from those who have been in the 'Research Field', to network, strategize and plan your career.

A significant push is also needed to increase awareness of clinical research as a career option as early as at school and college levels to prepare the next generation of the diverse clinical research workforce.

Our Program

FOR PROFESSIONALS

Bridging the gap between Sikh professionals and Clinical Research by empowering them to land a career in Clinical Research.

FOR PATIENTS

Working towards expanding access to translation services, reducing barriers of cultural differences, and providing educational resources to increase clinical trials participation.

FOR YOUNGSTERS

Providing students with engaging, valuable knowledge and educational material will cultivate their curious minds and increase their interest in clinical research.
